**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art made of record does not teach a speed control system for a fan motor comprising a driving circuit outputting a first and a second predetermined voltage signals, wherein the first signal voltage signal is higher than the second voltage signal and the motor has a low constant speed when a voltage signal is higher than the first predetermined voltage, a variable speed when the level of the voltage is lower than the first predetermined voltage but higher than the second predetermined voltage signal, and a high constant speed when the voltage signal is lower than the second predetermined voltage signal. Furthermore, the prior art does not describe a speed motor control system for a fan motor comprising a converting circuit for outputting a voltage signal, a voltage dividing circuit, and a drive IC, wherein the fan motor has a low constant speed when the voltage signal is higher than a partial voltage level of the voltage dividing circuit, a variable speed when the voltage signal is lower than the partial voltage of the voltage dividing circuit but higher than the low voltage level outputted by the IC, and a high constant speed when the voltage signal is lower than the low voltage from the driving IC.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
